

**INVITATION TO NPE EXHIBITION
CHICAGO, JUNE 22-26, 2009**

On behalf of Wentworth Technologies, I would like to invite you to visit our exhibit at the NPE Exhibition, being held at McCormick Place, Chicago, from June 22-26, 2009. We are located at the West Hall Booth # W133054.

Mr. Ark Wolos, Vice President and General Manager, Mr. Tar Tsau, Vice President of Engineering and General Manager, and myself, will be in attendance, and would be delighted to answer any questions that you might have.

We would also like to take this opportunity to discuss with you our patented EKO-MOLD and the Tooling Management Programs that Wentworth has developed to help our customers to deal with the great recession of 2009, namely:

- EKO-MOLD – Hot-fill Quick Change Mold System. This patented mold has the lowest operating costs and the lowest energy consumption on the market (reduction of up to 30%).
- Tooling Management Programs that includes review of existing tooling, identifies areas for improvement and potential cost savings, develops a streamlined tooling plan, and the purchase of best value tooling. Wentworth will also assist its customers in obtaining mold financing from financial institutions.

We do hope that you will visit us at NPE 2009 in Chicago, and will be pleased to discuss with you our innovations and tooling management programs, as well as any other tooling issues that you may be interested in.

Yours truly,

Walter T. Kuskowski
President & CEO
