

ANNOUNCEMENT

Mississauga, Ontario, Canada – July 11, 2006

ISO 9001: 2000 REGISTRATION

Amhil Enterprises, a member of the Wentworth Technologies Group of Companies, achieved ISO 9001:2000 Quality Management System registration for the Design and Manufacture of thermoformed plastic products in both its Canadian manufacturing facilities on July 7, 2006.

The ISO 9001:2000 registration shows that Amhil is committed to consistently delivering products and services that meet the customers' quality and regulatory requirements, while enhancing customer satisfaction and sustaining performance improvements.

"The ISO 9001:2000 registration demonstrates our commitment to quality," said Bruce McNichol, President and Chief Executive Officer of Amhil Enterprises. "Our customers know that we are applying the highest standards in order to deliver products and services to meet their needs. This registration is a key step in the maturation of our company, and marks a major milestone toward our goal of offering the highest reliability in the plastics thermoforming industry.

The ISO 9001:2000 registration is just the starting point in our plan of continuously improving our competitive position in the global marketplace. Issues such as getting to market faster, increasing operational efficiencies, offering ever improved and more consistent product quality, innovation, improved customer satisfaction, and lower costs to our customers, have never been more important in this increasingly global and competitive environment".

"Commitment from all of Amhil's employees was the driving force behind Amhil's success in achieving ISO registration," continued Bruce McNichol. "The ISO certification is a testament to each employee's commitment to this company and its customers. I am very proud of every member of the Amhil team".

"The registration of Amhil Enterprises is just the first phase of a long-term corporate ISO registration program intended to bring our customers value," said Bruce McNichol. "Wentworth Tech Central in Bydgoszcz, Poland (manufacture of injection mould tooling and contract injection moulding services) is already ISO 9001:2000 registered. Amhil Europa, our Polish thermoforming facility, is in the preparatory phases of ISO registration."

About Amhil Enterprises: Amhil Enterprises is member of the Wentworth Plastics Processing Group and is the largest independent manufacturer of thermoformed plastic lids for disposable cups in the world. Amhil has thermoforming facilities in Mississauga and in Burlington, Ontario, Canada as well as a thermoforming facility in Zarnowiec, Poland and an injection mould plastics processing facility in Bydgoszcz, Poland.

About the ISO 9001:2000 standard: The ISO 9001:2000 is an international standard for quality management, quality assurance and continuous improvement. It is a generic standard that can be applied across all industries, regardless of the products or services delivered. This standard refers to how an organization's processes are designed and managed to transform inputs of resources into products or services designed to meet the customer's objectives. Amhil's ISO 9001:2000 registration audit was conducted by QMI, North America's Leading Management Systems registrar.
